was the first virtual instrument (or .  
Show HN: Chatting about tech and  
programming every day - peted  
===== peted Initial feedback  
welcome. I just launched this site  
yesterday and I'll be adding more  
features over the next few weeks. ~~~  
michaelcampbell I'm a beta user (but I  
have no idea what it is; I didn't see any  
additional text anywhere) and I really

---

like it. Great concept. My only wish is for you to add "current issue" / discussion. That might be a problem with HN is this falls in the "troll" category... (and that's not meant flippantly) Typically, network routers provide connection to a client (or a portion thereof) to a plurality of network resources, for example, a file server or a web server. The network resources may be located within the

---

same IP network or may be located within another IP network. In addition, network routers may enable the transfer of data to and from a non-IP network, such as an ATM network. When a client is connected 570a42141b
