
XIA Configuration Server Crack Product Key Full Free [Mac/Win]

Download

XIA Configuration Server Crack+ Full Version Download For PC [Updated-2022]

XIA Configuration Server is an easy-to-use software utility for Windows based servers and workstations, SQL, Exchange, AD, VMWare hosts, and more, that allows you to quickly inventory and compare all systems in your network. The program is a useful tool that was designed to help you better manage your IT infrastructure. It scans your entire network, brings back information about all connected systems, and can, for example, expose incorrectly configured servers or security vulnerabilities. All the data can be viewed through an intuitive web interface and can be exported into professional reports to share with others. The output of the aforementioned reports can be customized to match your organization's branding by using custom color schemes and logos. Version 6.2.4 Build 912 - Updated: - Added support for server and server roles deployment settings. -

Improved URL generation for deployment settings. - Added support for multiple accounts for certain apps. - Added support for domain, site, and folder creation. - Added support for environment variables in deployment settings. - Added support for custom SMTP accounts. - Added support for deployment groups. - Added support for Windows Server 2008 R2 and Windows 7 SP1 deployment settings. - Added support for deploying to a UNC path. - Added support for specifying the process to run when deploying applications. - Improved compatibility for Firewall Settings. - Fixed a case where the application could report incorrect results on a network that uses CIFS. - Fixed a case where the application could crash when the package is being deployed. - Improved the behavior of the application when a network resource name cannot be resolved. - Improved the functionality of the application when a resource name cannot be resolved. - Improved the functionality of the application when the server cannot be reached. - Improved the processing speed of Windows domain and site creation. - Improved the processing speed of Windows environment variable generation. - Improved the processing speed of application deployment and configuration. - Improved the processing speed of server and server role deployment settings. - Improved the handling of reporting errors in the background thread. - Added support for specifying a snapshot in a URL. - Fixed a case where the app could generate error message boxes when run from an MSI package. - Fixed a case where the application could report incorrect results on a network that uses CIFS. - Fixed a case where the application could fail to connect to a server or connect to a server incorrectly. - Fixed a

XIA Configuration Server Crack Serial Key 2022 [New]

XIA Configuration Server

What's New in the?

XIA Configuration Server is a tool designed to automatically create a detailed inventory of all the systems on a network, including Microsoft Windows based Servers and Workstations, SQL, AD, Exchange, VMWare hosts, IIS, Clusters, DNS, and more. The program enables you to compare the configuration of items against their previous versions and hence, immediately determine whether a change was made. Moreover, the app supports the comparison of the baseline with a so-called "golden build" so that you can identify instances, servers or databases that do not adhere to the organization policy. Overall, the program is a useful tool that was designed to help you better manage your IT infrastructure. It saves you time and money by automatically auditing and documenting your network, a task that would take a lot longer to perform manually. It scans your entire network, brings back information about all connected systems, and can, for example, expose incorrectly configured servers or security vulnerabilities. All the data can be viewed through an intuitive web interface and can be exported into professional reports to share with others. The output of the aforementioned reports can be customized to match your organization's branding by using custom color schemes and logos.
