This tool is capable of detecting and removing the hidden spyware from your computer that may affect your system's security. It comes packed with multiple scan modes for dealing with such a process, and an intuitive interface. You may opt for a full scan of your computer to search for the spyware and adware infections. The estimated time for completing the scan is somewhere between two and ten minutes, but it may take even more, if you have large files stuck in your computer. The fast mode can help you scan the locations where the spyware may be hidden, and is able to carry out the task pretty quickly. The program scans the memory items, Registry files, directories and cookies. The smart mode is able to scan the Windows startup locations for files that may be considered dangerous to your system's health. You should be careful, as it may detect objects that are not infectious, and delete them permanently from your computer. The last one scans Windows folders for ADS (Alternate Data Streams), and it is only suitable if you have the NTFS partition type. For each aforementioned mode, a log is displayed at the end of the process containing all the details about the infections found. The log cannot be exported to a file. You may enable the auto protection feature to detect the infections that may cause harm to your PC, and remove them immediately. The application also offers Hijacker, ActiveX and HTA protection. It features backup options in case you encounter problems after removing the adware infection. An ignore list that you can create is also included. All in all, Free Spyware Vanisher bundles a decent pack of features for detecting and removing the hidden spyware from your computer. ...
