Exchange Exchange allows users to exchange drawing objects, drawings, and other drawings to share the information to coworkers or partners. The Exchange name is not an official trademark of Autodesk. AutoCAD Exchange is used to send and receive external files (such as geometry data, schematics, drawings, animations, and 3D models), over the Internet using file transfer protocols such as FTP. The Exchange protocol supports import and export of data into and from other drawing applications. There are no restrictions on file size, and the transfer is not encrypted. AutoCAD Exchange supports a number of protocols, including TCP/IP, SMB, HTTP, and PAS. Exchange can also be controlled via the Autodesk Exchange Manager (XM). This application can be installed on a Windows system and operates as an external server to Autodesk AutoCAD. This application is also integrated with Autodesk technical support and its license tracking system, to allow track the number of licenses used by a particular AutoCAD installation. AutoCAD Exchange Manager allows transfer of files using a user interface, and is integrated into Autodesk Exchange. There is also an option to transfer files with specific Autodesk Enterprise security settings. EDB files All AutoCAD features available in Autodesk Design Review (AutoCAD) are available for use in the native AutoCAD 2007 file format, the legacy R14 format. AutoCAD EDB is an AutoLISP add-on product for AutoCAD 2007. EDB was introduced in AutoCAD 2002 as the native file format for use with Autodesk Design Review (AutoCAD) files. Design Review EDB files contain the native data stored within Autodesk Design Review. Once a Design Review file is saved in EDB format, the user cannot open it in AutoCAD, Design Review or any other AutoCAD application. Internet AutoCAD can be configured to be hosted on a remote server that allows access to multiple users using remote desktop capabilities of Windows. The hosted AutoCAD instance is accessible through a web browser using a unique address of the server. A web browser is needed to view the drawings. AutoCAD Connect allows users to collaborate, see CAD drawings, share drawings and design with others. With the underlying technologies of the Autodesk Design Review, AutoCAD Connect allows customers to easily view, annot 5b5f913d15
